## PROJECTS

### Digital Content Management System

📅 06/2024 - Present

Environment: .NET Core 7.0 MVC, C#, PostgreSQL, Git, DSpace.

Description: This product is designed to manage digitally scanned documents based on metadata, with a search feature for locating documents. It is currently used by clients such as Mumbai University and Abhilekh Patal (PMO Office).

Responsibilities: Design, implementation, and continuous improvement, Deployment.

### Camp David(KeyStone)

**Environment:** .NET Web APIs, C#, SQL Server, React.js, Git, JIRA.

**Description:** This project aims to retrieve documents related to a list of loans based on user-defined criteria. Users can fetch all documents associated with a loan list or select specific documents. Documents can be viewed directly on the UI for a single loan or downloaded to a specified location.

**Responsibilities:** Gathering and analyzing requirements, designing technical documents, and developing multiple APIs and the project structure within specified timelines.
